Profile

I am a Front end developer with **3 years of professional experience.** Using **React.js, Javascript, Typescript, CSS3, HTML5, Tailwind CSS, Node.js, Express.js, Golang, and Svelte.** All along an **Agile** methodology. Also, I am **proactive, always trying to learn and improve, communicative, passionate about what I do, and assertive.**

Experience

Front end Consultant   Mar 2022 - Jan 2023
Apex Systems, Guadalajara, Jalisco
Involved in the successful integration of payment methods at an Ecommerce project. **I worked as a front-end consultant. Developed a variety of chores using React.js, Typescript, HTML, CSS, and PHP.** All along an Scrum methodology.

Activities:
- React.js development.
- Troubleshooting and debugging code.
- Writing clean, high-quality, high-performance, and maintainable Typescript code
- Refactoring.
- HTML and CSS.
- Unit testing with JEST, Enzyme and Testing Library.
- Version control with Git and Github.
- Integration of payment methods.
- Development of React.js functional components with Typescript.
- Implementing RESTful APIs and integrating with backend systems.
- Participate in Scrum methodology ceremonies.
- JIRA.

Full stack Software Engineer   Jul 2021 - Mar 2022
IBM, Guadalajara, Jalisco
I developed features for a quote-to-cash web app in a highly competitive team. **I worked as a front-end developer for this project using React.js, React hooks, Styled components, Golang, Jest, and Testing Library.** All with an Agile methodology.

Activities:
- React.js development.
- Making up React.js functional components out of wireframes.
- Writing clean, high-quality, high-performance, and maintainable Javascript code
